

JOB DESCRIPTION

POSITION: AUTOMATION TESTER/QA QC

Reporting to Team Lead

Salary: max 35,000,000 VND (NET)

Website: <https://www.idealogic.com.vn/>

Client: Netherlands, a global Web-app utilizing and supporting CRM system

Job Description

- You are responsible to control, develop and execute exploratory and automated tests to ensure product quality.
- You are responsible for designing and implementing tests, debugging and defining corrective actions.
- Your main focus is to accelerate deployment by continuous delivery and deployment. Increase confidence in making changes and ship faster.
- You will also review system requirements and track quality assurance metrics (e.g. defect densities and open defect counts).
- You will work closely with product owner, development team and QA team.
- Ultimately, you should monitor all stages of software development to identify and resolve system malfunctions to meet quality standards.
- Set-up and maintain Agile ITSM
- Review requirements, specifications and technical design documents to provide timely and meaningful feedback
- Guide and inspire the QA team
- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan and coordinate testing activities • Design, develop and execute automation scripts
- Identify, record, document thoroughly and track bugs
- Perform thorough regression testing when bugs are resolved
- Develop and apply testing processes for new and existing features
- Liaise with internal teams (e.g. developers and product owner) to identify system requirements
- Implement and maintain continuous delivery and continuous deployment
- Track quality assurance metrics, like defect densities and open defect counts

- Stay up-to-date with new testing tools and test strategies

Job Requirement

- At least Degree level (HBO; preferable in Computer Science, Engineering or related)
- Proven work experience with product software development
- Strong knowledge of software QA methodologies, tools and processes
- Experience in writing clear, concise and comprehensive test plans and test cases
- Hands-on experience with automated testing tools (like Protractor, VSTS)
- Experience with performance and/or security testing is a plus
- User-centric thinking and a critical mindset
- You have worked in lean startup and/or agile environments
- You have experience in continuous delivery and continuous deployment
- Accustomed to work in an international environment, speaks and writes English to an excellent standard.
