Reporting to Team Leader

Salary: max 1,500\$

Website: <https://spiderbox.design/>

Job Description

Laravel/ReactJS Full Stack Developer will be part of a fast growing team of developers to support a range of front end and back end projects for a large Australian client. You will be working with a small team of senior developers and QA initially to build velocity and support as a foundation team. We work within an Agile SCRUM methodology.

- Report directly to team leader
- Ability to work in an agile environment and Iterate quickly based on customer and internal feedback
- Constantly learn and keep abreast of emerging technologies.
- Accurate estimation and delivery of deadlines
- Support the QA process and ensure client delivery is 100% tested and stable

Job Requirement

Must have skills and experience:

- Over 2-year working experience with Laravel and ReactJS.
- Familiar with TDD/BDD
- Proficient understanding of code versioning tools, such as Git
- Clear communication skills for reporting needs and answering technical and service questions
- Experience working in an agile development environment
- Good problem-solving skills
- Good English communication skill

Prefer if candidate has the following:

- Experience working with foreign companies, in particular Australia
- Experience working in a fast paced agile team
- Is available to travel to Australia where required

Working time: Monday - Friday (Work from home 1-2 days a week)

Working location: 35 -37 Street 11, An Phu Ward, Thu Duc City.
