Reporting : Team Leader

Salary: max 2,000\$ NET

Website: <https://www.idealogic.com.vn/>

Job Description

- We are looking for a full stack developer with 5+ years of experience building SPA applications using modern Microsoft technologies (C#, Web API, Azure), and good front-end skills with at least 1 year using Angular 6 or greater and at least 2 years using Angular 2 or greater.
- You will be as lead developer key in helping to define and shaping our online global platform within a fast-growing start-up. As we are a small team, we are looking for a hands-on mentality. Someone who's comfortable in stepping outside their comfort zone every now and then.
- With our platform we bring transparency to the IT industry. Daily we research and profile thousands of IT companies worldwide. Our platform provides is the portal for our customers too all these profiles, data and insights. The application is built in Angular 8, C#, ASP.NET Web API, CosmosDB, Eventhub and other Azure technologies.

Your main responsibilities:

- Build, lead and motivate a local and/or remote scrum development team
- Deliver experiences worthy of enterprise delight
- Responsible for the Frontend and Backend stack and the realization of a solid architecture
- Enable development process improvements through tools and automation
- Safe-guard product quality
- Collaborate with our Data Team for new functionalities and solutions
- Attending daily standups
